MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM STATISTICAL ANALYSIS DEPARTMENT
AMERICAN TRUCKING ASSOCIATIONS, INC. 2200 MILL ROAD ALEXANDRIA, VA 22314 (703) 838-1791

TONNAGE INDEX DECREASES IN SEPTEMBER

General freight carrier tonnage decreased 3 points in September, 1986, from August, 1986 according to the ATA Truck Tonnage Index. At a level of 153.4(p) with 1967 = 100, the September tonnage is 0.2 percent below August's 153.7(r). The current month's volume is 18.3 points (13.6 percent) above the tonnage level in September, 1985.

The actual tons reported by motor carriers in the ATA survey increased from 4.96 million tons in August to 5.41 million tons in September, 1986. Actual tons increased 9%. Adjustments for variations due to seasonality and the number of working (trading) days decreased the September index level to 153.4(p).

From August, 1986 to September, 1986, Industrial Production increased 0.2% compared to the adjusted general freight tonnage index decrease of 0.2%.

These findings were announced today by the American Trucking Associations. (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the companywide operations of Class I and II motor carriers of general freight. Index coverage represents in excess of one-half of the tonnage moved by this type of for-hire motor carriers of property subject to Interstate Commerce Commission regulation.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

Cumulative tonnage for the first nine months of 1986 increased 3.1 percent from the same period in 1985.
